

Swiss Expert Meeting on Nanomedicine

Date: June 18, 2015, 9.00 am - 12.30 pm

Place: Room 1/H811 MEM Departement Klinische Forschung (DKF), Universität Bern,
Murtenstrasse 35, 3010 Bern

Aim: Nanotechnology has found its application in the manufacturing and clinical application of so-called "nanomedicines". In order to assure efficacy and safety of this group of drugs, the adaptation of knowledge obtained from fundamental research to development, manufacturing, clinical testing and application in therapy is needed.

The Swiss Academy of Pharmaceutical Sciences (SAPhS) is organizing this expert meeting in order to establish an overview on fundamental research activities and capabilities in the area of nanomedicine(s) in Switzerland. In addition, translation into the regulatory, clinical and industrial practice shall be discussed. The outcome of this meeting will be summarized in a position paper.

Organizers: Prof. Dr. Gerrit Borchard, School of Pharmaceutical Sciences Geneva-Lausanne (EPGL) and SAPhS
Dr. Peter Wick, Empa

Participants: Prof. Dr. Denis Hochstrasser University of Geneva
Prof. Dr. med. Patrick Hunziker, University Hospital Basel and European Federation of Clinical nanomedicine (CLINAM)
Dr. med. h.c. Beat Löffler, CLINAM
Prof. Dr. Wolfgang Meier, University Basel and Swiss Nanoscience Institute (NCI)
Prof. Dr. Stefan Mühlebach, University Basel, Vifor Pharma and SAPhS
Prof. Dr. Daniel J. Müller, ETH Zürich and NCI
Prof. Dr. Barbara Rothen-Rutishauser, Adolphe-Merkle Institut, Freiburg

Programm:

9:00 – 9:15	Welcome, presentation of participants	all
9:15 – 9:30	Introductory thoughts on „Nanomedicines“	Prof. Dr. Patrick Hunziker
9:30 – 12:00	Discussion	all
12:00 – 12:30	Next steps and wrap-up	all
12:30	Lunch (optional)	

RSVP saphw@saphw.ch
